T12

Features and Benefits

Color-Brite

- TCLP Compliant
- High 88 CRI
- Bright 5000K color
- 3,700-9,800 lumens
- Improves color rendition and visual acuity
- 1 to 2-year warranty

Arctic White/Vital Spectrum

- TCLP Compliant
- 5100K (AW) or 5600K (VS)
- High CRI of 90 (AW) or 92 (VS)
- 2,925 lumens (AW) or 2,200 lumens (VS)
- 2-year warranty

Better Light and Color with Litetronics T10 and T12 Lamps

T10 and T12 Color-Brite™ lamps contain the highest grade phosphor, allowing them to deliver a CRI that is 36% closer to sunlight than cool white fluorescents. With a 5000K temperature, Color-Brite lamps offer a much closer resemblance to natural light. They enhance colors and textures, improve visual acuity, and are ideal for businesses where colors must be accurate. The higher-powered Color-Brite HO (high output) is for areas that need a more powerful light source, such as large buildings or high ceilings.

The Arctic White™ fluorescent lamp is a replacement for cool white fluorescent lighting. Arctic White offers a crisp 5100K light source with a high CRI of 90. Its 2,925 lumen output is perfect for any non color-critical application. The Vital Spectrum™ fluorescent lamp offers a whiter light and higher CRI, but with less lumens than the Arctic White. Like the sun, Vital Spectrum's light provides vitamin D; this can assist plant growth and improve health in people.

Litetronics fluorescent lamps are TCLP compliant. The low mercury content of these lamps meets all government safety standards, and the lamps' long life cuts down on waste. The green ink on every Litetronics fluorescent lamp lets you know that it is an environmentally friendly choice.

Applications

- Color-critical applications
- Retail stores
- Hospitals
- Shopping malls
- Office buildings
- Dental offices
